MODEL PAPER

COMPREHENSION

In the world have we made health an end in itself? We have forgotten that health is really a means to enable a person to do his work and do it well. A lot of modern medicine is concerned with promotion of good health. Many patients as well as many physicians pay very little attention to health; but very much attention to health makes some people imagine that they are ill. Our great concern with health is shown by the medical columns in newspaper, the health articles in popular magazines and the popularity of the television programme and all those books on medicine where we talk about health all the time. Yet for the most only result is, more people with imaginary illnesses. The healthy man should not be wasting any time talking about health, he should be focussed on his work that health makes possible.

MODEL PAPER

- 1. Modern medicine is primarily concerned with**
 - (a) promotion of good health**
 - (b) people suffering from imaginary illnesses**
 - (c) people suffering from real illness**
 - (d) increased efficiency in work**

- 2. A healthy man should be concerned with**
